

Callfinity provides the easiest to use and most robust telecommunications systems.

Callfinity systems grow with your business because they are specifically designed to integrate with existing systems.

Callfinity is flexible to the specific demands of your organization and budget, providing both hosted and on-premises systems.

Callfinity cares about its customers. From senior executive involvement to a direct-to-engineer technical support model, 24/7/365, to the dedication of a single account manager, you're more than a number to everyone at Callfinity.

Callfinity ContextPBX™ helps build your business.

Administrators Become More Productive

The complexity of the switch is hidden by ContextPBX so supervisors can administer multiple stations and multiple lines easily, quickly and with confidence. Your customers connect to your employees reliably, even in high volume environments.

Investments are Protected

Starting at a low price point, ContextPBX can integrate into an existing environment with a standards-compliant architecture that scales elegantly with your business.

When your customers demand more, look to Callfinity to expand your productivity at lower costs and greater ease of use.
